Khiron Goes Green, Completing 1 Megawatt Solar Energy Park in Colombia

- Solar park can generate up to 40% of the energy needs at its 5 hectare facility in Doima, Colombia
- Project demonstrates Khiron's commitment to sustainability by reducing its carbon footprint by approximately 570 tons of CO₂ a year, while decreasing operational energy costs

TORONTO, June 24, 2020 /PRNewswire/ - Khiron Life Sciences Corp. ("Khiron" or the "Company") (TSXV: KHRN), (OTCQX: KHRNF), (Frankfurt: A2JMZC), a vertically integrated cannabis leader with core operations in Latin America and Europe, announces the completed installation of a state-of-the-art 2,600 panel solar park that will generate electricity to power the Company's production facility in Doima, Colombia.

Developed with ReFeel, a leading Italian renewable Company with more than 80 MW installed in Europe and Latin America, Khiron's solar park is expected to generate up to 700 kWh through a photovoltaic (PV) system that comprises 2,618 installed solar panels. With the construction of the PV system, Khiron can self-generate up to 40% of the energy it needs for day-to-day facility operations and is expected to reduce CO₂ emissions by 570 tons a year.

"Installation of the solar park at our Doima production facility brings Khiron exponential efficiencies, allowing us to significantly reduce operational energy costs and benefit from tax reductions, as we actively commit to deploying sustainability initiatives across our operations," comments Khiron CEO and Director Alvaro Torres. "We're proud to take actions aimed at sharply reducing greenhouse gas emissions and making this contribution to help counter the global environmental challenge."

The solar park project delivered direct employment to a team of 20 personnel in the local Doima community and provided access to globally recognized solar energy technical

training in PV systems and renewable energy installations, enhancing the teams future participation in projects of the same type, at a regional and national level. "We are continuing to support the Doima community, improving resource and waste management in the area as part of our company-wide sustainability program," continues, Mr. Torres.
